

# Technical Data Sheet

## Product: DT031

THE EDGE  
ON SAFETY

### DESCRIPTION

Floor transition strip designed for carpet to concrete or wooden floor height transitions. Suitable for interior or exterior use, this profile creates a tidy edge trim for carpeted floors. Available in natural satin or mill finish.

### MATERIAL

T6 6063 Alloy aluminium - Available in Mill Finish or Natural Satin anodised.

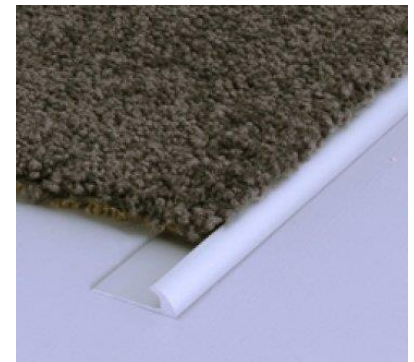

Standard 2.5 Meter Lengths.

### DIMENSIONS

### EXAMPLE

For this installation, DT031 has been laid on a concrete floor as a transition strip to 3/16" carpet. This eliminates a trip hazard and adds a tidy finish to the carpeted edge.

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
