

# Technical Data Sheet

## Product: DT035

THE EDGE  
ON SAFETY

### DESCRIPTION

Floor finishing trim strip available in natural satin. This profile is designed to create a tidy transition between carpet to vinyl. Suitable for interior or exterior application. This profile is designed to be curved. This is the curved alternative to DT030.

### MATERIAL

T6 6063 Alloy aluminium - Natural Satin anodised.

Standard 2.5 Meter Lengths.

### DIMENSIONS

### EXAMPLE

In this example the difference between DT030 and DT035 can be clearly seen. DT035 is fabricated slightly differently to allow the trim to be contoured on site to match a contoured floor within its specification details.

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
